#### **CHRISTIE GROUP PLC**

#### Interim Results for the 6 months to 30 June 2004

#### Chairman's Interim Statement to 30 June 2004

I am pleased to report that our operating profit for the half year to 30 June 2004 has risen to £1.4 million (2003 - £0.8 million) on increased sales of £35.7 million (2003 - £31.6 million). This improvement has been reflected in our eps of 2.41p (2003 - 1.37p). The Board have declared an interim dividend which remains at 1p per share.

Some highlights are detailed below, but the mix includes 16% sales growth in our Professional Business Services Division; a good performance from the recently acquired retail stocktaking business, Orridge, but lower sales from the software businesses which have faced difficult market conditions.

As reported at the time of releasing our figures for 2003, the integration and revitalisation of the Orridge Retail Stocktaking business is proceeding well. This is illustrated by the improvement in our Stock and Inventory Services Division to a profit of £0.5 million from a loss of £0.1 million in the corresponding period last year. Impressively, turnover has risen from £8.6 million to £11.3 million for the half year as we continue to add new contracts.

Our Software Solutions Business has seen an increase in retail exports through our newly established offices in Italy and the UK with recent signings such as Rangers Football Club and Sarah Lee (branded apparel) in Italy, and elsewhere in territories such as Israel and China with the assistance of local distributors. Our Hospitality business has been amalgamated in the UK with our Retail business, which has facilitated a reduction in future costs through some rationalisation of services.

The costs of our new software product development for this division for the 2004 year and subsequent periods are being capitalised as a precursor to the new International Financial Reporting Standards being introduced in 2005. The figure capitalised in the half year was £206,000 (2003 - nil). The development programme will generate new income from 2006.

Our Professional Services business enjoyed a strong first half, with turnover up 16% and profits

increased by 38%. For the first time, all branches of our newly completed Financial Services

UK network made a contribution.

Agency sales remained buoyant throughout the first half in all of our chosen sectors of activity.

Our corporate advisory teams were busy in the period providing transactional, investment and

valuation advice to clients including QMH, Thistle Hotels, Network Rail and Travelodge.

During the period, we relocated both the Group and Christie & Co's head offices to larger and

more modern premises adjacent to our former Victoria Street location. We believe that the

Greater London agency business (where our Group has its origins) offers scope for increased

levels of profitable trade. To gain further share of the London market, we will be opening two

further London sales offices under the Christie & Co brand and utilising the christie.com

website. These offices will be located "North and South".

Our International agency offices have increased turnover and moved closer to profitability whilst

remaining a long way from maturity.

The heralding of higher interest rates keeps us watchful of our weekly sales indicators, but we

are experiencing no weakening of our sales volumes.

#### NOTES TO THE FINANCIAL STATEMENTS

# 1. Basis of preparation

The financial information in this interim report does not constitute statutory accounts within the meaning of section 240 of the Companies Act 1985. Statutory accounts for the year ended 31 December 2003, upon which the auditors gave an unqualified opinion, have been delivered to the Registrar of Companies.

With the exception of software development costs the unaudited results continue to be prepared in accordance with the accounting policies set out in the financial statements for the year ended 31 December 2003.

Anticipating the International Financial Reporting Standard the group has capitalised software development costs. This represents a change of accounting policy from prior periods when development costs were written off in the year in which they arose. Software development costs capitalised in the period to 30 June 2004 amounted to £206,000. There is no impact on the results in respect of prior periods.

A subsidiary company bank loan of £3,824,000, which is currently being renegotiated, is included within current liabilities.

# 2. Segmental information

Turnover and operating profit/(loss)

	Unaudited half year to 30 June 2004		Unaudited half year to 30 June 2003		Audited year to 31 Dec 2003	
	Turnover	Operating Profit/(loss)	Turnover	Operating Profit/(loss)	Turnover	Operating Profit/(loss)
Division	£000	£000	£000	£000	£000	£000
